

FROM ORDINARY TO EXTRAORDINARY

Myers Construction Management

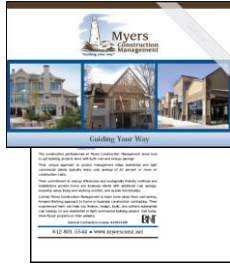

Background - Who?

Myers Construction Management provides fully inclusive contracting and design/build services for residential and light commercial clients. *"Always on time and on budget."*

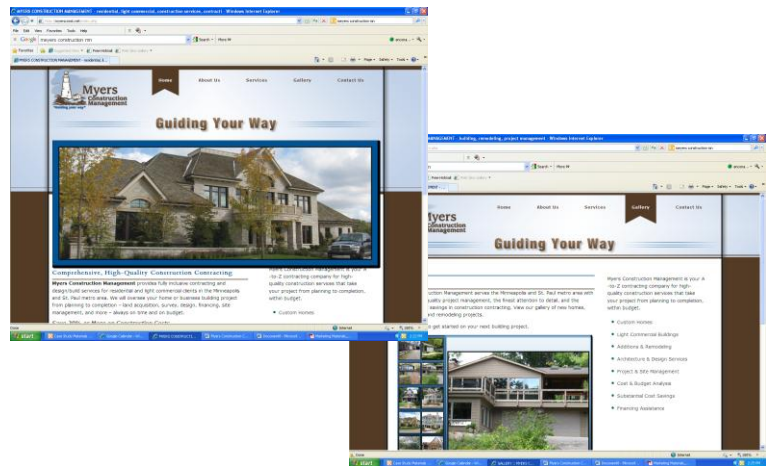

Challenge - Why?

Duane has successfully grown Myers Construction Management over the years, but made a decision to improve their brand, marketing materials, add a website and standardize their business forms.

Strategy - How?

Duane and Bryan Schreifels met through BNI; Duane was impressed with the products and services EBS had to offer. He knew the importance of having professional marketing materials, an online presence, including a website, and back office organization. EBS effectively developed Duane a new logo, a professional brand, marketing materials, a website and business operating forms.

Results - What?

With the help of EBS, Duane now has an online presence through his new website, a library of professional marketing materials, a logo, a professional brand and back office business operating forms to help him grow his business.
