

FROM ORDINARY TO EXTRAORDINARY

P&F Machining

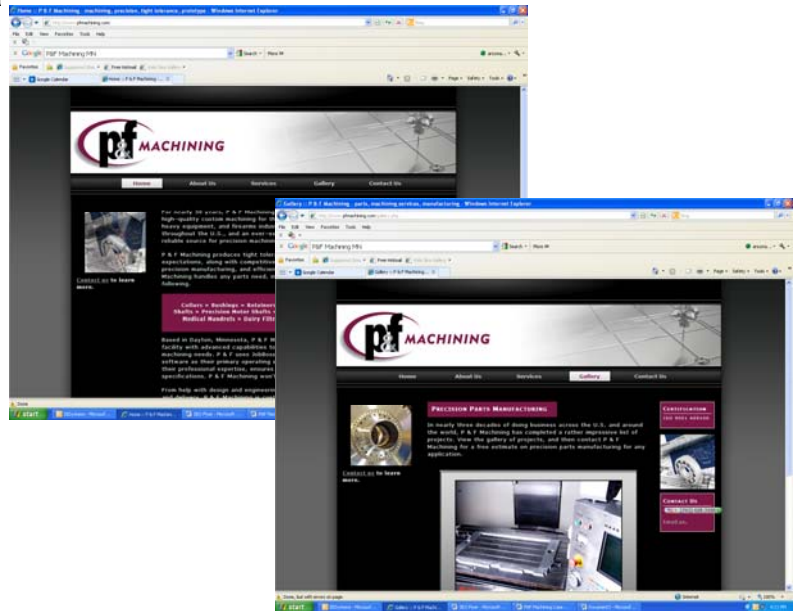

Background -Who?

For nearly 30 years, P&F Machining has built a solid reputation for high quality custom machining for the aerospace, medical, agriculture, heavy equipment and firearms industries. P&F Machining is throughout the US and ever-expanding international market as a reliable source for precision machining.

Challenge - Why?

The P&F Machining family has successfully grown their business over the years. They made the decision to expand into new markets and in doing so wanted a fresh new look for their business.

Strategy - How?

Debbie and Dan met with Emerging Business Systems to develop a fresh new look starting with their logo, branding materials and marketing materials. Then in Phase II, they completed their website to professionally pull it all together.

Results - What?

Now armed with a new look; their brand, marketing collateral and website truly match the quality of workmanship F&F Machining continues to deliver as they expand into new markets and business categories.
